Laser Module	650nm	Range at Night	500 yd., 457.2 m
Batteries	4 x 377		

LaserLyte® answers the growing demand for lasers specific to the increasingly popular conceal carry market with the new Ruger LCP Side Mount Laser (CK-AMF). At half the cost of a leading competitor, the CK-AMF fits on the side of the Ruger LCP and the Kel-Tec .380 and .32. Easy to mount on the gun by simply pushing out and replacing the stock pins with the new screws (included). Then push the ergonomic activation button with the index finger and the laser is on target. The CK-AMF design works also as a finger guide that allows for safe trigger control without blocking the laser beam.

The programmable laser features a pulse or constant on mode and also has an auto-off function to prevent an unwanted battery drain. The side mounted laser allows the pistol to fit in virtually any nylon pocket holster. The new LaserLyte Ruger LCP Side Mount Laser is compact and light, and foremost – deadly for only \$99.95.

** Normal usage is defined as one minute on and one minute off. This test mimics actual usage where the unit is turned on and off and the battery is given time to automatically regenerate.*
