<b>Laser Module</b>	650nm	<b>Height</b>	1.54 in., 39.22 mm
<b>Batteries</b>	2 x A76	<b>Range at Night</b>	500 yd., 457.2 m

LaserLyte® proudly introduces the CK-MS for the popular personal defense pistols, the Bersa® Thunder .380 and .380 Plus. The laser is easy and quick to mount on the Bersa® trigger guard and snugs-up securely to the dust cover. It is simple to activate with the ambidextrous, ergonomic switch. The LaserLyte® CK-MS laser is easily programmable to either constant on or pulse mode. Another great feature is the "auto-off" feature that displays a unique flash after 5-minutes of operation and automatically turns the unit off after 6-minutes.

Constructed from T6 aluminum with a black chrome finish, the LaserLyte® CK-MS is durable and corrosion resistant. With the LaserLyte® CK-MS securely attached, the Bersa Thunder .380 or .380 Plus is the go-to personal defense pistol.

\* Normal usage is defined as one minute on and one minute off. This test mimics actual usage where the unit is turned on and off and the battery is given time to automatically regenerate.
