

## SPECIFICATIONS

<b>Product</b>	Center Mass™ Laser Sight	<b>Battery Life</b>	6 hours
<b>Part #</b>	CM-15	<b>Weight</b>	5.4 oz / .153kg
<b>MSRP</b>	\$284.95	<b>Length</b>	3 in / 7.619cm
<b>Compatible Firearms</b>	Firearms with a minimum of 3" rail space	<b>Width</b>	2.43 in / 6.172cm
<b>Power Output</b>	Class IIIA, 5mw	<b>Height</b>	1.37 in / 3.479cm
<b>Batteries</b>	1 - CR123 Lithium		

The Kryptonite® Center Mass™ Laser; an industry-first, laser system displaying a ring of green laser dots surrounding the center aiming laser for rifle and shotgun. Developed to decrease target acquisition time and increase levels of accuracy for rifles and shotguns with a Picatinny rail (3 inches or longer), the LaserLyte CM-15 helps the user quickly center the shot within the ring. The CM-15 projects a ring of 8 green laser dots with one green laser dot in the center as the aiming laser. The circle grows at one-inch per yard, approximately the same configuration as a shotgun aimed at a moving target. The green laser, which aids in daylight visibility, gives the user the advantage of a wide field-of-view while using both eyes for aiming.

The user-friendly, military-styled laser with clear laser engraved markings has a recessed activation selector that can be changed to off, constant on and momentary on. The

remote switch is used with the 10-inch length, 2-inch tape switch area with copper braided cord.

The compact and lightweight Kryptonite® Center Mass™ Laser is made from aircraft grade 6061 aluminum with a T3 hardness and black anodized to Level 2 hardness for maximum durability. The laser is fully adjustable with hex drive screws protected by sealed turret caps. The offset design of the CM-15 allows for a variety of mounting options.

The LaserLyte® Kryptonite® Center Mass™ Laser gets sport shooters and professionals on the target faster, increasing accuracy and overall hits.
