<b>Compatible Firearms</b>	All Glock® pistols	<b>Height</b>	.35 in., 8.89 mm
		<b>Range at Night</b>	500 yd., 457.2 m

The RTB-GL rear sight laser fits all GLOCK® firearms. The high performance laser built into a rear sight features a simple, ambidextrous “press and go” activation. The laser is easily programmable to either constant on or pulse mode. Another great feature is the “auto-off” feature that displays a unique flash after 5-minutes of operation and automatically turns the unit off after 6-minutes.

\* Normal usage is defined as one minute on and one minute off. This test mimics actual usage where the unit is turned on and off and the battery is given time to automatically regenerate.

Made from heavy-duty, high carbon steel for added durability, the LaserLyte® RTB-GL rear sight laser has a black chrome finish for corrosion prevention. A great benefit of the LaserLyte® RTB-GL rear sight laser is that the customer will not have to replace grips, internal stock parts or holsters. The LaserLyte RTB-GL rear sight laser is compatible with all Level 1 and Level 2 holsters including the BLACKHAWK!® SERPA® holster system.
