Battery Life	8,000 Tip Overs

Batteries	9V
Length	3.82 inch/9.7 cm
Diameter	2.00 inch/5.1 cm
Weight	4.25 ounces/.12 kg

LaserLyte® introduces the innovative and entertaining Laser-Plinking-Can 3-Pack Set. When hit with a laser from any of the LaserLyte® training cartridges or other laser trainer tools, the cans react by jumping up and falling over just as a real can would. This reaction is all powered by a 9V battery (included) and a spring loaded plunger released by a solenoid. To reset the cans, simply stand them up and depress the plunger.

The LaserLyte® Laser Plinking Can Set provides hours of training and entertainment indoors or outdoors without the cost of ammunition or the clean-up of cans after the fact! Laser Plinking Can Set is sold in a three-pack with three 9-V batteries included. One battery will tip the can over about 8,000 times.
