FOR IMMEDIATE RELEASE

LaserLyte® Introduces One Side Mount Laser that Fits All Taurus Revolvers and all S&W J-Frames; the LaserLyte® CK-SWAT

The Best of Both Worlds Made Easy and Affordable from LaserLyte®

COTTONWOOD, AZ (February 2012) – Leave it to [LaserLyte®](http://www.laserlyte.com), the leader in laser technology for the shooting sports market for 25 years, to bring the best of two popular lasers into one single, simple and affordable laser; the LaserLyte® CK-SWAT. The side mounted laser fits on all of the Smith & Wesson J-frame revolvers ever made and all Taurus revolvers. And now, the Taurus Judges including the Public Defender finally has a laser system to call its own with the CK-SWAT laser.

**Smith & Wesson J-Frame with
CK-SWAT**

The new LaserLyte® CK-SWAT laser mounts easily underneath the grip and is the only laser system available that allows the customer to retain the factory grip and comfortably and easily holster the firearm. The CK-SWAT is also compatible with many aftermarket grips including Hogue® and Pachmayr®.

Taurus Judge with CK-SWAT

To install the LaserLyte® CK-SWAT, simply choose one of the four included base plates that fit the revolver, remove the grip and screw the unit into place. Replace the grip and sight in the firearm with common X and Y adjustments. When ready to activate, simply press the button located at the back of the laser as you draw the firearm from the holster. The laser is easily programmable to either constant on or pulse mode.

-more-

Another great feature is the "auto-off" feature that displays a unique flash after 5-minutes of operation and automatically turns the unit off after 6-minutes. This feature can be reset at anytime to prevent accidental activation and battery depletion. The LaserLyte® CK-SWAT unit can also be easily removed and placed on any other compatible firearms.
