FOR IMMEDIATE RELEASE

LaserLyte® Newest Laser Trainer Cartridge; The LT-380

LaserLyte® responds to the fastest growing segment of the firearms market; the concealed carry/personal defense market, with a training product specifically for the popular .380 caliber

COTTONWOOD, AZ (March 2012) –[LaserLyte®](http://www.laserlyte.com), the leader in laser innovation and technology for the shooting sports market for 25 years, has developed the LaserLyte® LT-380 laser trainer cartridge to fit all Ruger LCP's, Kel-Tec's, and Smith & Wesson .380's. The concealed carry market is the fastest growing and largest segment in the firearms industry and demand for easy-to-use, quality training products is ever increasing. LaserLyte® answered the call with this simple to operate, laser training cartridge with an integrated snap cap that inserts into the firearm chamber.

The LaserLyte® LT-380 laser trainer cartridge provides the user with the most realistic training including tap, rack, bang or malfunction drills. The LT-380 fits inside the pistol chamber and the firing-pin activated switch indicates the bullet impact with a bright red laser dot. Besides being able to train anywhere, the LT-380 works perfectly with LaserLyte's Laser Trainer Target system (TLB-1), the interactive, battery operated, portable training system.
