FOR IMMEDIATE RELEASE

LaserLyte® Slashes Pistol Bayonet Pricing

LaserLyte's bestselling, edged accessory for the Picatinny rail just got a sharper price!

COTTONWOOD, AZ (April 2012) –[LaserLyte®](http://www.laserlyte.com), the leader in laser technology for the shooting sports market for 25 years, gets to the point with the product-of-the-moment, the LaserLyte pistol bayonet, by slashing the price to just \$19.95. Just when the economy is edging out consumer spending, LaserLyte whet's the appetite by offering

the new price for all five LaserLyte pistol bayonet models. From the razor-sharp, 1.85 inch Ka-Bar® for the smallest of North American Arms revolver to the Ethan Becker, of Becker Knife and Tool designed Mini Bayo with web cutter, serrated blade and unique chiseled edge, LaserLyte's popular pistol bayonet are ready for any close encounter or just to start the conversation.

Other LaserLyte pistol bayonet models include the serrated version of a mini survival knife with an exaggerated top serrated blade and two-tone design. At only 2.75 inches, the serrated pistol bayonet fits any medium to large pistol with rail. Off and on is as simple as the pressing of two buttons and sliding it on or off. The serrated pistol bayonet also comes with a custom polymer sheath. The LaserLyte Warthog pistol bayonet was the one that started it all. Whether it's looking cool or last minute defense, the Warthog is made tough and can be used on or off the pistol. Available in black or stainless the LaserLyte original Warthog pistol bayonet adds a new edginess to otherwise plain black handguns.
